4 Antennas & Transmission Lines The transmitter that generates the RF power to drive the antenna is usually located at some distance from the antenna terminals. The connecting link between the two is the RF transmission line. Its purpose is to carry RF

SWRA046A 4 ISM-Band and Short Range Device Antennas In the radiating near field the radiated field predominates, the antenna impedance is only slightly influenced by the surrounding media in this region. But the dimensions of the antenna can not be neglected with respect to the distance from the antenna.

## OVERVIEW OF ELECTROMAGNETIC WAVE PROPAGATION - d C. Jenn

SPECIAL ANNOUNCEMENT! I am pleased to announce that my son Collin has received his HAM radio license and is becoming active in the Hi-Q-Antennas manufacturing and marketing!

### Hi-Q Antennas

Medium frequency (MF) is the ITU designation for radio frequencies (RF) in the range of 300 kilohertz (kHz) to 3 megahertz (MHz). Part of this band is the medium wave (MW) AM broadcast band. The MF band is also known as the hectometer band as the wavelengths range from ten to one hectometer (1,000 to 100 m). Frequencies immediately below MF are denoted low frequency (LF), while the first band ...

### Medium frequency - Wikipedia

cations, this latter loss term has been ignored, because it was always assumed that typical air-spaced variable capacitors had exceptionally high Q factors, and hence extremely small losses.

### C:Documents and SettingsBrMy DocumentsMy PicturesIEEE

Very low frequency or VLF is the ITU designation for radio frequencies (RF) in the range of 3 to 30 kilohertz (kHz), corresponding to wavelengths from 100 to 10 kilometers, respectively. The band is also known as the myriameter band or myriameter wave as the wavelengths range from one to ten myriameters (an obsolete metric unit equal to 10 kilometers). Due to its limited bandwidth, audio ...
