

arduino based automatic plant pdf

Arduino Uno is a microcontroller board based on the ATmega328P ().It has 14 digital input/output pins (of which 6 can be used as PWM outputs), 6 analog inputs, a 16 MHz quartz crystal, a USB connection, a power jack, an ICSP header and a reset button.

Arduino Uno Rev3

The Arduino Nano is a small, complete, and breadboard-friendly board based on the ATmega328P (Arduino Nano 3.x). It has more or less the same functionality of the Arduino Duemilanove, but in a different package.

Arduino Nano

Simple Arduino Audio Player and Amplifier with LM386. Adding sounds or music to our project will always make it looks cool and sounds much more attractive.

Smart sprinklers and irrigation controllers can simplify home lawn and garden care, and reduce water consumption. Instead of fixed timers, these systems draw on data from sensors, weather forecasts and plant-care databases to determine watering needs and deliver just enough moisture at just the right time.

Community & Discussion. For most questions, it's probably best to submit a post in the forums for widest community visibility and easily writing out the nitty-gritty details of your situational context – for example, including example code and detailing the relevant configuration of your software, firmware, and hardware. Alternatively, real-time chat via IRC is a great way to converse with ...
