Downstream processing refers to the recovery and purification of biosynthetic products, particularly pharmaceuticals, from natural sources such as animal or plant tissue or fermentation broth, including the recycling of salvageable components and the proper treatment and disposal of waste. It is an essential step in the manufacture of pharmaceuticals such as antibiotics, hormones (e.g. insulin ...

B. Special Sessions B4. Modern Engineering Education Andy Dicks, University of Toronto. Bio: Andrew (Andy) Dicks joined the University of Toronto Chemistry Department in 1997, after undergraduate and graduate studies in the United Kingdom. He was hired as part of the university teaching-stream faculty in 2001 and has research interests in undergraduate laboratory instruction that involve ...

### **Keynote Speakers | 68th Canadian Chemical Engineering**

Dr. Richard D. Noble is the Alfred T. and Betty E. Professor of Chemical Engineering at the University of Colorado, Boulder. He is an internationally recognized leader in the use of novel membrane and thin-film materials, including zeolites, ionic liquids and liquid crystals, for chemical separations.

Bioprocess Science Minor. Coordinator: Dr. Gary Scott . The bioprocess science minor gives students an understanding of the rapidly developing bioprocessing industry, which uses the chemical, physical and biological processes developed by living organisms or their cellular components in a type of advanced manufacturing of specialty commercial products.

Protein precipitation is widely used in downstream processing of biological products in order to concentrate proteins and purify them from various contaminants. For example, in the biotechnology industry protein precipitation is used to eliminate contaminants commonly contained in blood. The underlying mechanism of precipitation is to alter the solvation potential of the solvent, more ...

Description The fifth edition of the Kirk-Othmer Encyclopedia of Chemical Technology builds upon the solid foundation of the previous editions, which have proven to be a mainstay for chemists, biochemists, and engineers at academic, industrial, and government institutions since publication of the first edition in 1949.. The new edition includes necessary adjustments and modernisation of the ...
