Cellular and Molecular Immunology, 9th Edition (PDF)

Immunology is a branch of life-science which deals with the cellular and molecular events occurring in the body after encounters of micro-organisms and other foreign substances. The history of immunology is quite old. In ancient China, people often used skin lesions of patients recovered from small pox to cure small pox in young children.

Cellular and Molecular Immunology Module1: Introduction

Recognize the clinical relevance of the immunology through discussions of the implications of immunologic science for the management of human disease. Grasp the details of experimental observations that form the basis for the science of immunology at the molecular, cellular, and whole-organism levels and draw the appropriate conclusions.
