Methods of Comparing Images Compare Program The "compare" program is provided to give you an easy way to compare two similar images, to determine just how 'different' the images are. For example here I have two frames of a animated 'bag', which I then gave to "compare" to highlight the areas where it changed.

In statistics, the standard score is the signed number of standard deviations by which the value of an observation or data point is above the mean value of what is being observed or measured. Observed values above the mean have positive standard scores, while values below the mean have negative standard scores. The standard score is a dimensionless quantity obtained by subtracting the ...
