

desalination engineering operation and pdf

Desalination is a process that takes away mineral components from saline water. More generally, desalination refers to the removal of salts and minerals from a target substance, as in soil desalination, which is an issue for agriculture. Saltwater is desalinated to produce water suitable for human consumption or irrigation. One by-product of desalination is salt.

In 1928 King Abdul Aziz established Kendasa (Condenser) in Jeddah (MED). 1965 Ministry of Agriculture established desalination department. 1969 Duba and Alwajh desalination MSF plants commissioned 198 m³/d (52000 gpd) each. 1974 Saline water Conversion Corporation (SWCC) established.

Desalination In Saudi Arabia An Overview - SAWEA

The Nemmeli Desalination Plant is a water desalination plant at Nemmeli, Chennai, on the coast of the Bay of Bengal that supplies water to the city of Chennai. It is located about 35 km south of the city centre, along the East Coast Road. Built at a cost of ₹ 5,333.8 million, the plant is the second desalination plant in the city after the 100-MLD (million litres per day) plant at Minjur and ...

Figure 1: A diagram of water distillation, the most simple thermal desalination process. Here, a flame is applied to a beaker containing salt water; the water evaporates leaving the salts behind. The water vapor then travels up and into the adjacent tube, where it condenses and drips into the flask as pure liquid water.

Energy Efficient Reverse Osmosis Desalination Process

Desalination technology has been around for the better part of the last century. Many countries, municipalities, armed services and ships have the need to produce fresh water by desalination because of their lack of natural sources of fresh water. Desalination technology has brought fresh water and hence industrial and

Desalination is a method for producing water for human consumption, irrigation or industrial utilisation. In this study, a reverse osmosis (RO) system for brackish water desalination was theoretically investigated to produce both potable drinking and agricultural water with a lower overall and specific energy consumption.
